

## QUALITY AND ENVIRONMENTAL POLICY

All activities of Kelteks d.o.o. are aimed at delivering added value to the design, development, production and distribution of technical textiles for reinforcements, while promoting environmental, economic and social responsibility and keeping the customer in focus.

This Quality and Environmental Policy is an integral part of the company's business policy, and our management systems are certified according to ISO 9001 and ISO 14001.

The policy of the company and its employees revolves around ensuring absolute customer satisfaction by adapting to their needs and meeting all requirements and expectations while upholding mutual trust.

In order to improve our competitiveness, we continuously enhance the quality of our processes, products and services through our own innovations and by introducing fresh knowledge and new technologies into our production processes.

All employees receive continuous training and professional development tailored to the demands of our production processes and systems. We ensure that our employees work in a safe working environment by adhering to legal regulations and providing necessary protective equipment to maintain the highest possible level of safety at work.

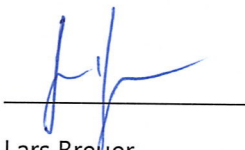

The company also focuses on using environmentally friendly equipment and technologies and builds partnerships with customers and suppliers aimed at continuous improvement, prevention of pollution and optimized use of resources. Our commitment to responsible resource management starts with the planning of production processes, products and business operations.

The entirety of our company's operations is centered around environmental protection and raising environmental awareness and the level of protection among our employees. By separating and collecting recyclable waste, we reduce the amount of waste disposed of in landfills. The company actively participates in environmental protection through continuous prevention of any adverse impact on the environment, both during the production and use of our products and services.

The company management ensures proper operation of the system by providing all necessary resources and conducts regular checks and reviews of the functionality of our quality and environmental system.
